

## Patient Report for SAMPLE 2

---

Age:	58
Sex:	Male
Chest Pain:	Typical
Trestbps:	114 mm Hg
Chol:	318 mg/dl
FBS:	False
RestECG:	Showing probable or definite left ventricular hypertrophy
Thalach:	140
ExANG:	No
Old Peak:	4.4
Slope:	Reversible
Ca:	3
Thal:	Normal

### Conclusions:

Your age is above 50, which may increase the risk of heart disease. Ensure regular check-ups and maintain a healthy lifestyle to mitigate risks.

Your cholesterol level is higher than the normal range (200 mg/dl). To reduce cholesterol, consider a low-cholesterol diet, regular exercise, and medication if prescribed by your doctor.

As per input data No Heart Disease Detected

Relax and Follow below mentioned Lifestyle Changes:

1. Eat a healthy diet
2. Regular exercise
3. Maintain a healthy weight
4. Carry-out regular health check-ups
