

Patient Report for SAMPLE

Age:	58
Sex:	Female
Chest Pain:	Typical
Trestbps:	100 mm Hg
Chol:	248 mg/dl
FBS:	False
RestECG:	Normal
Thalach:	122
ExANG:	No
Old Peak:	1
Slope:	Fixed
Ca:	0
Thal:	Reversible

Conclusions:

Your age is above 50, which may increase the risk of heart disease. Ensure regular check-ups and maintain a healthy lifestyle to mitigate risks.

Your cholesterol level is higher than the normal range (200 mg/dl). To reduce cholesterol, consider a low-cholesterol diet, regular exercise, and medication if prescribed by your doctor.

As per input data Heart Abnormality Detected.
